Just a note to stress the importance of embedding a focus on inequity, racism, and large-scale community/systems change, if we hope to make a lasting impact. (EO)

With the unsheltered committee I would like to work on EMS and Health equity issues. This would be oriented to providing some type of health outreach to those unsheltered or in the camps. (Mike Hilley)

It is our hope that these subcommittees will do the following:

1. Seek out, learn from, and include key voices from our community members & partners to inform the function area of their sub-committee.
2. Stay current on trends and needs of the function area of your sub-committee.
3. Bring back relevant learnings from #1 and 2 above to the full HSW in order to best inform Action Items.
4. Propose Action Items, Recommendations, and Generative Conversation topics to be included on the HSW agendas.

It will be expected that sub-committees regularly report back to the full HSW on their activities, with a focus on #4 above.

*Please note that sub-committees must stay under a quorum of the full HSW (no more than 11 official HSW members at any single sub-committee meeting) so as not to trigger open public meetings act requirements.
